

## Ridgewood Post Office, Ridgewood, New Jersey

The Ives Group led by Joel Ives, AIA rehabilitated the historic Ridgewood Post Office for the United States Postal Service. The exterior envelope of the structure which had been subject to water infiltration was retrofitted with a new roof, new insulated glass windows in the proper historic vocabulary, and cracking in the brick was repaired and reinforced with stainless steel anchors to prevent future problems. The entrance doors were reconfigured to allow for hand-capped accessibility and an interior retrofit included the lobby, new lighting system and an upgrade of the HVAC system. The design resulted in a complete refurbishing of both exterior and interior elements of the history structure which is an important part of downtown Ridgewood.
